WORK EXPERIENCE

Software Engineer
Graana.com

12/2022 - Present   *Islamabad, Pakistan*

I'm a Software Engineer at Graana.com, leading the frontend team for their real estate marketplace, Graana.com, built on Next.js. I started as a Front-End Developer and quickly advanced. In my current role, I shape user experience and functionality, developing dynamic web applications with Next.js. I collaborate with the backend team, occasionally using Express.js, showcasing my Full-Stack capabilities. I'm committed to driving the company's success and innovation in the future.

Front-End Developer - Internship
Graana.com

09/2022 - 11/2022   *Islamabad, Pakistan*

During my three-month internship at Graana.com, I gained valuable web development experience by focusing on ReactJS and contributing to various projects. I created a Slack clone application and worked on enhancing their CRM system. This internship improved my front-end development skills and teamwork abilities, preparing me for future opportunities.

PROJECTS

Graana.com - Real Estate Marketplace
- As the lead frontend developer for the graana.com portal project, I led the Next.js development, ensuring adherence to design guidelines, and creating a seamless user experience, enhancing performance, and contributing to project success

SLACK CLONE using MERN STACK, SOCKETS and WEBRTC
- Developed a real-time communication platform using MERN stack, Socket.io, and WebRTC, enabling users to engage in text-based and voice conversations. Implemented features for creating both public and private group chats, showcasing strong proficiency in full-stack development and real-time communication technologies
